About Our Company

Royal Eye Solar Power Company commenced business operation in the year 2000 as a distinguished manufacturer & supplier of a quality assortment. We are an end-to-end, customer oriented alternative energy company that brings you cutting-edge solar energy solutions. We are centered on marketing, trading, transportation, distribution of solar panels, distribution of all solar installation equipment's, Installation of ONGRID/ HYBRID/OFFGRID solar system, Solar Inverters, Solar Water heater, Lithium Batteries, Solar Batteries, Solar Street Lights, Solar Garden Lights etc. in Kerala and around in India.

We have 25 years of Experience in the field and get repeated orders for our range due to its better illumination capacity, Cost effectiveness, environment friendly high sensitivity, Power Saving, Reliable and Simple Installation nature. Sometimes, our range is offered with customize solutions to meet exact demand of the customers. The long term goal of our company is to focus on being the pioneer in meeting the energy requirements of diversified industries. We have well equipped infrastructure which is fitted with modern facilities required for efficient production process. In addition to this, our store room is properly ventilated and cleaned at regular interval of time.

**Commitment to
sustainability
and innovation**

Why Should Royal Eye?

HIGH QUALITY Solar Panel !!

We are the major dealer of VIKRAM / ADANI/ RENEW / GOLDI & UTL Panels. All are environmentally friendly renewable energy offering a broad portfolio of technologies, products & solutions to our clients globally! The solar energy industry continues to evolve with innovative technologies that improve efficiency, reliability, and long-term cost savings. Among the top advancements are Topcon solar cells and bifacial solar panels, two key technologies that are revolutionizing the way solar power is harnessed and utilized. Consistent efficiency in low-light and high-temperature environments. Bifacial solar panels represent a significant leap forward in solar technology by capturing sunlight from both sides of the panel. Unlike traditional panels that only collect light from the front, these innovative panels can absorb reflected light from the ground on their rear surface, increasing their overall energy production by 5-30%, depending on installation conditions. The solar cell type, design, and configuration all impact panel efficiency, with the N-type back-contact (IBC) cells being the most efficient. Our products are suitable for Indian weather and grid conditions and our solutions make adoption of solar power, techno-commercially viable everywhere.

SOLAR INVERTER

We are the dealer of SOLAIRE/INVT/SOFAR/DEYE/UTL Inverters. A solar inverter is an essential part of a grid-connected solar system. Solar panels generate DC electricity, which must be converted to alternating current (AC) electricity to be used in homes and businesses. This is the primary role of the solar inverter. Solar inverters come in many varieties and sizes. Main types are string solar inverters, micro inverters and hybrid inverter. When choosing between string, micro, or hybrid inverters, it's essential to understand your specific needs, budget constraints, and system requirements. Consider factors such as shading, panel orientation, energy storage requirements, and backup power needs to determine the best fit for your household. Consulting with a qualified solar installer or system designer can also provide valuable insights and recommendations based on your individual circumstances.

Benefits of solar Inverter

**Growing global
demand for
renewable energy**

lithium battery & Tubular battery

Our own made REX , available for both Lead Acid & Lithium Until around 2014, most battery systems were made up of deep-cycle lead-acid batteries. However, over recent years, different variations of lithium-ion batteries have dominated due to the many benefits, including being lightweight, scalable, highly efficient, and having a longer life. Nowadays, hundreds of manufacturers offer a wide variety of lithium batteries, from large modular rack-mounted systems for off-grid use to small portable, compact power systems. For many people, economics is not the primary driving factor for purchasing a battery. There are many other valid reasons for households and businesses to invest in battery storage from the feel-good factor to providing backup power in the event of an emergency. In our opinion, self-sufficiency and energy security are both valid reasons. A battery can significantly increase energy independence using solar and help accelerate the transition to a renewable-powered electricity system, provides back up power during excess solar energy to reduce your grid usage, supporting the grid during peak times and provide grid stability

LITHIUM BATTERY TECHNICAL SPECIFICATION

Model No	Cell Type	Capacity (Ah)	Weight (kg)	Dimensions (mm)
REX-12V-100AH-LP100	LFP	100	15.5	1000
REX-12V-150AH-LP150	LFP	150	25.5	1500
REX-12V-200AH-LP200	LFP	200	35.5	2000
REX-12V-250AH-LP250	LFP	250	45.5	2500
REX-12V-300AH-LP300	LFP	300	55.5	3000
REX-12V-350AH-LP350	LFP	350	65.5	3500
REX-12V-400AH-LP400	LFP	400	75.5	4000
